

Aigo Drive Video Recorder

AHD C100 / AHD C600 (HD Recording)

Aigo In-car Camera Recorder features a 270 degree, 2.4 inches rotatable LCD screen and 120 degree viewing angle. It is also equipped with a low light visibility and infrared night vision device to work well in daylight and night time conditions, rain or shine.

Peace of mind when you are on the road with function like motion detection recording. The Aigo In-car Camera Recorder will start recording, and end recording automatically with car engine. Beside, it can record and store up to 32GB of videos (with an option to overwrite the files when your SD card is full). Playing back the videos is easy. Just remove the SD Card from the device, and plug into any computer to watch the videos which consist of audio, date and time.

Should you prefer HD recording, opt for AHD C600 which comes with a HDMI output and has a photosensitivity level of 1.3M pixel.

- Recording automatically starts and ends intelligently with ACC power
- Equipped with low light visibility and infrared night vision device to work well in daylight and night time Conditions
- Play back recording video consists of audio, date and time and can be used evidence for own protection
- Record fixed-length video clips of 3, 5 and 10 minutes
- 2.4 inch LCD screen for watching videos while recording road conditions
- Motion Detection Recording
- Photo format: JPEG
- Image format video: AVI
- HDMI Output: AHD C600 only
